ABSTRACT

THE DEJITARU TSUKA ECOSYSTEM is a dynamic and innovative blockchain ecosystem pioneering the development of the Dragon Chain. It is designed to provide a secure, efficient and community-driven platform for decentralized applications (dApps) and digital assets. By design, Dejitaru Tsuka (TSUKA) serves as the primary gas token — akin to ETH on the Ethereum network — driving transaction processing and computational operations. However, the true essence of TSUKA lies in its commitment to community building and collaboration with developers and thousands of dedicated members working hand-in-hand to shape the future of DeFi.

THE TRUE ESSENCE OF TSUKA LIES IN ITS COMMITMENT TO COMMUNITY BUILDING AND COLLABORATION WITH DEVELOPERS AND THOUSANDS OF DEDICATED MEMBERS WORKING HAND-IN-HAND TO SHAPE THE FUTURE OF DEFI.

INTRODUCTION

BACKGROUND

THE DEJITARU TSUKA ECOSYSTEM IS BUILT ON THE FOUNDATION OF ETHEREUM'S INFRASTRUCTURE WITH THE DRAGON CHAIN AS THE BLOCKCHAIN BEING DEVELOPED WITHIN THIS ECOSYSTEM.

It enhances scalability and reduces transaction costs while preserving the essence of decentralization.

TSUKA, our native gas token, forms the backbone of this ecosystem similar to how ETH powers the Ethereum network.

VISION

OUR VISION IS TO CREATE A THRIVING, COMMUNITY-DRIVEN BLOCKCHAIN ECOSYSTEM WITHIN TSUKA WHERE DECENTRALIZATION AND INCLUSIVITY ARE AT THE FOREFRONT. We aim to empower users, developers and stakeholders to actively participate in the growth and governance of the Dragon Chain.

OBJECTIVES

OUR PRIMARY OBJECTIVES ARE AS FOLLOWS:

- Foster a strong sense of community ownership and involvement.
- Establish TSUKA as the go-to gas token for transactions.
- Ensure the stability and sustainability of the ecosystem through SHIELD and X.
- Build a technically robust and secure infrastructure.
- Provide a platform for innovative decentralized applications and use cases.

TSUKA

ROLE AND IMPORTANCE

TSUKA IS THE LIFEblood OF THE DEJITARU TSUKA ECOSYSTEM.

It serves as the gas token fueling transactions and smart contract executions. Its importance is akin to ETH on the Ethereum network underpinning the entire ecosystem's functionality.

TSUKA AND GAS FEES

Users must hold and utilize TSUKA to pay for gas fees when interacting with the Dragon Chain within the Dejitaru Tsuka Ecosystem. This ensures that transactions and operations on the network are financially sustainable while maintaining accessibility and decentralization.

**TSUKA IS THE LIFEblood
OF THE DEJITARU TSUKA
ECOSYSTEM**

MINING AND STAKING

To further enhance decentralization, TSUKA can be acquired through mining or staking. This allows community members to actively participate in securing the network and be rewarded for their contributions.

COMMUNITY BUILDING

COLLABORATIVE DEVELOPMENT

DEJITARU TSUKA IS NOT SOLELY A DEVELOPER-LED PROJECT — IT'S A COMMUNITY-DRIVEN INITIATIVE.

Developers and the community collaborate to shape the future of the Dragon Chain within the ecosystem by proposing and implementing upgrades, improvements and innovations.

TRANSPARENCY AND INCLUSIVITY

We prioritize transparency in decision-making processes allowing all community members to participate, provide feedback, and influence the direction of the Dragon Chain within the Dejitaru Tsuka Ecosystem.

WE BELIEVE THAT INCLUSIVITY FOSTERS INNOVATION AND LONG-TERM SUSTAINABILITY.

HOSHI GOVERNANCE

HOSHI, our governance token, empowers the community to propose and vote on changes, ecosystem upgrades and initiatives. Decisions are made collaboratively to ensure a truly decentralized and inclusive governance model within TSUKA.

SHIELD AND X: STABILITY AND SUSTAINABILITY

SHIELD AS THE LIQUIDITY PROVIDER

SHIELD serves as the liquidity provider for our stable currency token currently known as X. This strategic role ensures that the ecosystem within TSUKA remains 100% self-sustainable reducing reliance on external factors and promoting decentralization.

THE STABLE CURRENCY AND NATIVE PAIRING TOKEN

X is designed to maintain a stable price serving as a reliable store of value and a native pairing token for all trading activities within the Dragon Chain of the Dejitaru Tsuka Ecosystem as well as maintaining the ability to integrate into social and commercial (e-commerce) platforms. **X FOSTERS STABILITY AND ENHANCES UTILITY WITHIN THE ECOSYSTEM.**

TECHNICAL INFRASTRUCTURE

01 SCALING SOLUTIONS

Our technical infrastructure incorporates an optimistic rollup scaling solution that processes transactions at a much higher rate and lower cost while maintaining compatibility and utilizing the security and overall infrastructure of the Ethereum network. This model reduces the network congestion on Ethereum by only submitting transactions for final throughput to the main net.

02 SECURITY AND CONSENSUS MECHANISM

SECURITY IS PARAMOUNT. Using the main net for data availability, our layer 2 solution retains the prominent security features of the Ethereum network while providing faster and more cost effective transactions. The Ethereum network serves as our dispute resolution layer should any transaction validity issues occur. Additionally, validators on the layer 2 solution stake their assets as collateral for the operating process and thus are incentivized to act with integrity.

03 INTEROPERABILITY

The layer 2 solution is designed to be interoperable with other blockchain ecosystems fostering collaboration and expanding the possibilities for decentralized applications. The layer 2 solution will ultimately become open source encouraging wide-scale development of improvements in cross-chain functionality.

USE CASES, APPLICATIONS AND COMMUNITY BUILDING

DEFI ON DRAGON CHAIN

Our ecosystem provides a fertile ground for decentralized finance (DeFi) projects including lending, borrowing, yield farming and decentralized exchanges all powered by the Dragon Chain within TSUKA.

DECENTRALIZED EXCHANGES

The Dragon Chain facilitates the development of decentralized exchanges within TSUKA empowering users to trade various assets against X as the base currency pair.

NFT ECOSYSTEM

TSUKA supports a thriving NFT ecosystem enabling the creation, trading and ownership of non-fungible tokens with a focus on community-driven art and collectibles all built on the Dragon Chain.

FOSTERING A VIBRANT COMMUNITY

AT THE HEART OF THE DEJITARU TSUKA ECOSYSTEM LIES OUR VIBRANT AND ENGAGED

COMMUNITY. Our commitment to community building extends beyond governance and decision making — it encompasses the development of Web3 applications that empower our users and foster growth.

An example is the **THE URULOKI TRADING DAPP** – *Uruloki is a cryptocurrency trading dApp developed and funded by the TSUKA community. It allows the user to set limit orders for buying and selling of cryptocurrencies, implement unlimited trading strategies, and take advantage of arbitrage opportunities. The fees generated by Uruloki will help sustain future utility advancements for the Dejitaru Tsuka Ecosystem.*

SUPPORTING ERC20 TOKENS

Our ecosystem is not limited to a single token, but thrives on diversity. Various ERC20 tokens have found a home within the Dejitaru Tsuka Ecosystem (officially and unofficially) supporting its overall growth and journey. These tokens — each with its own purpose — enrich our ecosystem and contribute to its vibrancy.

**OUR ECOSYSTEM IS NOT
LIMITED TO A SINGLE TOKEN,
BUT THRIVES ON DIVERSITY**

ROADMAP

DEVELOPMENT MILESTONES

Our roadmap includes continuous enhancements, protocol upgrades and expansion of use cases within the Dejitaru Tsuka Ecosystem. This white paper is an amendable, living document. It can be edited and improved by means of pursuing developmental decentralization across the entire ecosystem. **COMMUNITY FEEDBACK AND COLLABORATION ARE INSTRUMENTAL IN SHAPING OUR JOURNEY.**

FUTURE ENHANCEMENTS

We remain committed to exploring emerging technologies to ensure that the Dragon Chain within the Dejitaru Tsuka Ecosystem remains at the forefront of blockchain innovation.

A SOCIAL EXPERIMENT IN DECENTRALIZATION

BUILDING A RESILIENT AND COMPASSIONATE COMMUNITY

The Dejitaru Tsuka Ecosystem is not only a technological innovation, but also a profound social experiment in decentralization. Beyond the code and the blockchain, it is an endeavor to form a resilient and strong-willed community of critical thinkers and personalities who exhibit altruistic and compassionate traits. We believe that true decentralization extends beyond technology and into the hearts and minds of those who participate in this ecosystem.

ALTRUISM AND COMPASSION

In our quest to build a decentralized ecosystem, we aim to foster a spirit of altruism and compassion within our community. **WE ENCOURAGE OUR MEMBERS TO CONSIDER NOT ONLY THEIR OWN INTERESTS, BUT ALSO THE WELL-BEING OF THE COLLECTIVE.** This ethos guides our decision-making processes, our governance model and our interactions within the Dejitaru Tsuka Ecosystem.

**TRUE DECENTRALIZATION EXTENDS BEYOND TECHNOLOGY AND INTO THE
HEARTS AND MINDS OF THOSE WHO PARTICIPATE IN THIS ECOSYSTEM.**

THE TSUKA SANGHA

In the spirit of our commitment to community and compassion, we must mention that as individuals we acknowledge that **“WE ARE ALL NOBODY, BUT TOGETHER WE ARE THE TSUKA SANGHA.”**

This phrase encapsulates the idea that while individuals may be insignificant on their own, together they form a powerful and resilient community.

The word “Sangha,” derived from Buddhist traditions, defines the spiritual community that supports and guides us on our path towards enlightenment and true decentralization.

As we navigate the challenges and opportunities presented by the Dejitaru Tsuka Ecosystem, we do so with the knowledge that our strength lies not just in our technology, but in the bonds that we form, the compassion we exhibit and the resilience we share.

Together, we are the TSUKA Sangha, and together, we will shape a brighter future for the decentralized world.

**I HAVE GIVEN YOU THE BLUEPRINT.
NOW BUILD TOWARDS DECENTRALIZATION.**

CONCLUSION

EMBRACING COMMUNITY AND DECENTRALIZATION

**THE DEJITARU TSUKA ECOSYSTEM
IS A TESTAMENT TO THE POWER OF
COMMUNITY-DRIVEN DEVELOPMENT.**

Together, we strive for a future where decentralization, inclusivity and sustainability are the cornerstones of our blockchain ecosystem.

JOIN THE TSUKA COMMUNITY

We invite you to be part of this exciting journey within the Dejitaru Tsuka Ecosystem.

Join our community and participate in governance to help us shape the future of the Dragon Chain.

Together, we will build a more decentralized, sustainable and innovative blockchain ecosystem.
